The population of our country is getting older. Not only are we living longer, but the population over the age of 65 is also growing quickly. In 2011, baby boomers (born between 1946 and 1964) will begin to turn 65. The “Silver Tsunami” of Americans who will require additional care and services in the next 10 years will grow by 35.9 percent, leaving the door open to disreputable companies that take advantage of unsuspecting seniors. As many public health officials have stated, it is not enough to be aware of these changes, we must prepare for them. Companies like Window Universe have taken the initiative by assuring the safety of senior citizens.

“Companies participating in SeniorChecked commit to meeting the highest standards in the marketplace,” said Jack Hansan, Co-Founder. “Across the country, the aging population is growing, along with incidents of fraud, scams, and exploitation against seniors. This trend will affect both seniors and their families and the service providers who serve them.”

SeniorChecked is the first network that authenticates businesses and professionals who serve senior citizens by requiring that the highest standards in the current marketplace are met.
